

Canterbury Pharmacies Ltd

Gender Pay Gap Report 2018

Under new legislation that came into force in April 2017, UK employers with more than 250 employees are required to publish their gender pay gap in order to show how large the pay gap is between their male and female employees.

Headline gender pay figures

The information below shows our median and mean gender pay gap and bonus pay gap based on hourly rates of pay as at the snapshot date of 5 April 2018, and bonuses paid in the year to 5 April.

Pay and bonus gap		
	Median	Mean
Gender pay gap	-1.0%	15.1%
Gender bonus pay gap	-36.4%	62.3%

Proportion of employees receiving a bonus	
Female	63.6%
Male	50.7%

Understanding the gap

Canterbury Pharmacies Ltd's workforce is made up of significantly more female than male staff across the workforce in which the majority of roles are those of pharmacy counter and dispensary assistants – roles currently predominantly undertaken by women. This profile reflects the nature of the community pharmacy sector. Although there is an overall average (mean) pay gap of 15.1 % the median pay gap is actually negative with women paid 1.0% more than men.

We are confident that men and women are paid equally for doing equivalent jobs across our organisation and that the pay gap is related to people carrying out different roles.

With regards to bonuses, a slightly greater proportion of women received bonuses than men. However, the average bonus pay gap is much higher than the hourly pay gap. This arises because the relative proportion of men in more senior roles is higher than that of the business as a whole.

Canterbury Pharmacies Ltd believes in being an inclusive and diverse organisation where everyone has the opportunity to reach their full potential. We will continue to ensure that all future roles, particularly those at a senior level, are made equally available to both male and female candidates.

I confirm that the data reported is accurate.
